

Juan de Oliveira Barbosa Vieira

Senior Full stack & Blockchain developer

📍 Conceicao do Jacuipe, Brazil

SUMMARY

I'm a Senior Full-Stack Developer with over 10 years of experience building reliable and scalable web applications for businesses and startups.

I specialize in React, Next.js, Node.js, TypeScript, Python, and Go — creating high-performance front-end interfaces and secure back-end systems. I've delivered SaaS platforms, dashboards, and API-based services that handle large volumes of data and transactions.

My focus is on clean architecture, maintainable code, and business-ready performance. I collaborate closely with teams to turn complex ideas into efficient, production-quality software.

In addition to full-stack development, I also have expertise in blockchain integration — connecting modern web apps with smart contracts and decentralized systems when needed.

If you need a dependable developer who understands both technical depth and business goals, let's connect and discuss your project.

EXPERIENCE

Project Manager

BBChain 04/2024 - 03/2025 São Paulo, Brazil

<https://www.bbchain.com.br/>

BBChain is a company specialized in corporate Blockchain technology.

- Led blockchain-FinTech integration projects and improved cross-team workflow efficiency.
- Supervised the launch of two tokenization platforms and collaborated on Brazil's Digital Real (DREX) sandbox initiative.
- Worked closely with developers to design reusable smart contract modules adopted across multiple projects.
- Learned to bridge technical execution with business strategy in complex, regulated environments.

Senior Software Engineer

Value Mídia 04/2021 - 03/2024 Minas Gerais, Brazil

<https://valuemidia.com.br/>

Brazilian company providing web development and digital marketing services.

- Developed and maintained scalable web platforms serving thousands of daily users.
- Optimized backend performance and reduced API response times by over.
- Collaborated with product and design teams to deliver reliable SaaS and analytics solutions.
- Learned to align technical implementation with business growth and client needs.

Fullstack Developer

HiperGuia 04/2019 - 03/2021 Sergipe, Brazil <https://hiperguia.com/>

MNET LLC provides web development services with a focus on WordPress.

- Built personalized, location-based business information pages to enhance user experience.
- Designed and implemented RESTful APIs to efficiently handle diverse business data.
- Improved web application performance and scalability using both frontend and backend technologies.
- Collaborated with the team to deliver technical solutions that met project requirements.

SKILLS

Solidity

Rust

Solana

Golang

Python

Web3

NestJS

Node.js

React

Next.js

Angular

Typescript

STRENGTHS

Collaboration

Collaborated with product, design, and dev teams to deliver secure, high-quality blockchain solutions.

Attention to Detail

Carefully writes, tests, and reviews code to ensure reliable, bug-free functionality across both frontend and backend systems.

Prioritizing

Effectively identifies and focuses on the most critical tasks, balancing frontend, backend, and project requirements to deliver features on time.

EDUCATION

Bachelor of Computer Science

[UNINTER International University Center](#)

04/2015 - 03/2019 Paraná, Brazil

GPA 4.0 / 4.0

- My major skill is computer science and I have received Bachelor of computer science
